Hi Reza,

As I had mentioned in the email, we don't donate these outdated boards. You can contact Digilent and see if they are willing to provide discount. My sincere suggestion is to move to newer technology. I would suggest Basys3 or Nexys4-DDR boards. These boards have many more recourses and are supported by our new mainstream tools, Vivado. I strongly suggest you to switch over from ISE to Vivado.

If you are willing to do that, then I can donate 1:1 for the Basys3 board you purchase or 3:5 for the Nexys4-DDR (3 donated for every 5 purchased). You need to provide prrof of purchase and I can approve the appropriate numbered boards. I also can donate Vivado.

Let me know what you would like to do.

Regards,

Parimal
