777 Glades Road, Field House 11-25C
Boca Raton, Florida 33431-0991

Dear Dr. Graves,

We have received your request in regards to the technology fee grant. As a University and Athletics Department we pride ourselves on being able to support other departments and local community partners. The FAU Athletics Department appreciates the research that the Exercise Science and Health Promotion (ESHP) Department has done over the past four years with FAU student-athletes and would like to show our support for a technology fee grant for the AlterG.

We know that this state-of-the-art equipment would not only benefit the ESHP Department research and their students, but could also be used to help rehabilitate the FAU student-athletes. The information would not only contribute to important research, but also gives us another component in assisting with the student-athletes return to play.

As a department we are constantly looking for ways to enhance the student-athlete experience. FAU Athletics would like to support the Exercise Science and Health Promotion (ESHP) Department's purchases of the latest advanced equipment, so additional assessment may be conducted and current research continued.

If there is anything else that we can do to assist during this process, please do not hesitate to reach out. Thank you for your continued commitment and dedication to our student-athletes and research.

Sincerely,

Patrick Chun
Vice President and Director of Athletics
