

## Agilent 1100 HPLC System w/

## Agilent 1100 HPLC System w/ VWD

**Our Price: \$19,265.00**

The Agilent 1100 HPLC System guarantees the most efficient mixing and pulse-free solvent delivery for consistently fast and accurate results. The system's optimized design using a quaternary pump allows variable stroke volumes for stable solvent flow. This electronically activated inlet valve runs synchronous to the pistons to eliminate vapor formation in volatile solvent, making the Agilent 1100 both remarkably easy-to-use and maintenance-free. It also features a high-speed proportioning valve and a pre-configured degasser, which allow convenient low-pressure mixing and a large solvent choice flexibility.

## Jasco PA-2080 Plus Intelligent, Analytic Isocratic SSQD HPLC Pump

**\$1,230.00**

+ \$32.00 Shipping

~~\$1,500.00~~ **Save 18%** ⓘ

The Jasco Isocratic Pump ensures optimal sensitivity for low level analytes in small samples using electrochemical (EC) detection. This pump provides a wide flow rate and pressure range provides flexibility for all common EC applications. A stainless-steel-free flow path eliminates artifacts in your biomolecule analyses.

## JASCO AS-950 INTELLIGENT AUTOSAMPLER A1 REFURBISHED CONDITION

**Price: £1,100.00**

Approximately  
**EUR 1,248.81**

Hach AS950 Automatic Samplers collect and store representative water samples for accurate laboratory analysis. AS950 automatic samplers are available in three base types: portable, indoor refrigerated, and all-weather refrigerated, and are compatible with a variety of bottle sets of varying size, quantity, and material. The AS950 is configurable to meet all sampling needs by combining a controller, a base, a bottle set, accessories and sampling program features

Thermo Dionex Coulochem III Electrochemical Detector HPLC 70-9140 Coulometric

\$2,780.00

Thermo Scientific Dionex Coulochem III offers you a choice the only ECD system on the market that delivers the best in both amperometric and coulometric performance giving you the capability you need for your specific application. The Coulochem III provides the options necessary for performing pulsed amperometric detection and cyclic voltammetry for maximum flexibility. The most sensitive, sophisticated electrochemical detector available, the Coulochem III is ideal for use in methods development or for routine applications requiring high-sensitivity detection of a single or a small group of analytes.

Part Number: 00G-4252-E0

Description: Luna® 5 µm C18(2) 100 Å, LC  
Column 250 x 4.6 mm, Ea

Stationary Phase: C18 with TMS endcapping

Solid Support: Fully Porous Silica

Format: Column

Separation Mode: Reversed Phase

Recommended Use: Separation of hydrophobic  
compounds

USP Designation: L1

Brownlee RP-18 Aquapore ODS, NewGuard Cartridge Column, 15 x 3.2mm, 7µm, 3 pack

New guard cartridge columns are small guard cartridges to help prolong column life by eliminating particulates, contaminants and strongly bound sample components. Requires holder P/N 07150001.
