Thank you for choosing [Texas Instruments](#). We believe that facilitating hands on implementation of projects for student learning and research with universities is a vital investment of time and resources. Such collaborative efforts with both educators and students are clear investments in the bright engineering minds that will shape the evolving future of technology. TI has a deep commitment to the enablement of realization of ideas into real systems.

The TI Worldwide University Program is dedicated to support educators, researchers and students with assistance in the integration of TI technology into course curricula, senior design and research projects. From teaching materials to design

projects, our advanced Analog and Embedded Processing technologies fuel the passions of students and educators in more than 4,000 universities worldwide.

Please see the [University Program website](#) to answer your technical questions. Our goal is to provide you with the information you need for the integration of TI technology. Discover the TI tools, products and resources to meet your academic needs. Ask questions, seek recommendations, share knowledge, explore ideas, and even help solve problems with fellow engineers on TI's [E2E Support Community](#).

Have A Great Day!

Alexandria Davis
