MEMORANDUM

TO: Carol Hixson, Dean
FROM: Oge Marques, Professor of Computer Science and Engineering
DATE: November 3, 2015
SUBJECT: Tech Fee Library Resources support

A handwritten signature in black ink, appearing to read "Oge Marques", is positioned to the right of the "FROM:" line.

In my capacity as Library Liaison and member of the UFS Library Advisory Committee, representing the College of Engineering & Computer Science, I offer my strong support for the Tech Fee proposal requesting additional library resources for our college. The addition of the requested Springer Computer Science e-book package to the library would support the information needs of faculty, students, and researchers, as well as afford the flexibility of remote, 24/7, multi-user access. As the college continues to expand and advance in research, it is essential that the library continue to provide access to appropriate resources.
